

RECYCLABLE HANDICRAFT PROJECT

We empower rural women groups to become financially independent through the production of quality recyclable handicrafts made from hemp & Allo fiber.

The handicraft center is setup locally in the village so that it will be easier to do the work for women and they can also support their extra work at home

	Adults (3 in a group)
	Family (2 Adults + 2 Children)

A registered non-profit social enterprise supporting local farmers and empowering rural women's group. Visit the beautiful village of Sarangkot Pandeli, experience coffee culture, local life and make a positive difference to the local community

OUR WORK FEATURED IN FAMOUS VLOG

Impact

40 rural women have given basic and advanced level of sewing training since 2017 with the help of French NGO

10 of those women are now employed on part-time basis at our handicraft centre.

How can you make a difference?

Purchase our handicrafts, gifts and souvenirs at various partner venues & during our guided tour.

Visit the working spaces during the coffee and bee farming tours.

ABOUT US

Sharing Seeds is a non-profit social enterprise registered with the Nepal Government and based in Sarangkot-Pandeli village (near Pokhara, the Tourism capital of Nepal). It aims to improve organic agricultural practices and helps women empowerment programs.

We provide small farmers and youths with knowledge of how to grow organic arabica coffee and organic Beekeeping which helps them to sustain their life financially independent.

We also support local women's groups by providing jobs in recyclable handicraft production.

ORGANIC ARABICA COFFEE FARMING

We coordinate with small farmers especially women and youths around Sarangkot village and nearby regions, to support the production of organic arabica coffee by providing skilled training, the right information, and quality plant distribution.

We provide direct economic benefit to small farmers by purchasing their coffee cherry paying 30% higher price than other private and government collector.

Impact

1000 Arabica coffee tree plantations were done since the project

95 small organic coffee farmers are benefiting to sell their coffee cherry

Small coffee farmers get 30% more for their coffee cherries through Sharing Seeds

How can you make a difference?

Enjoy an Arabica coffee experience tour in a beautiful village with the help of a local guide.

Purchase our Nepalcafé coffee products from various ethical outlets around the Pokhara region and while on our Guided Tour

ORGANIC BEE FARMING

We provide training to the local youths and motivated women about organic beekeeping and also provide information on the importance of bees to our environment and their role in the human complex food chain. Small beekeepers are supported in their self-employed businesses and provided with a platform to sell their organic honey.

Impact

150 bee hives were installed at our local bee station & surrounding villages, cumulating to a production of 150kg of organic honey yearly.

5 new bee farmers joined us.

1 full-time job was created at the coffee processing centre and bee farming station for local youth.

How can you make a difference?

Visit our bee farming station and enjoy a Bee Experience tour.

Purchase our organic honey to support local bee farmers.

Why us?

Many youths in Nepal migrate to foreign countries mostly gulf countries in early age to work in low paid and dangerous jobs.

We provide training in organic Arabica coffee farming and the means to support themselves and their community.
